Healthy Kids!

Welcome back to another term of Healthy Kids at Carlton Primary, hope you all had great holidays. Parents who use the program or are interested in enrolling children in the program are asked to be aware

of the following important information:

- all children who attend the program need to have had their parents fill out an enrolment form this year
- all children must be collected before 6:00pm
- after 6:00pm late fees will be charged at \$1 per minute
- all children must be collected by a person 16 years old or older
- The YMCA Carlton Healthy Kids Program can be contacted on 0431964769 between 3:00pm and 6:00pm on school days, or can be contacted through Mel Lorback at Carlton Baths on 93473677
- to gain access to the building after 5:30pm use the buzzer near the

door or phone Carlton Healthy Kids, the main door at Carlton Primary is locked for safety reasons. Please fill out a parent permission slip if your child/ren will be attending Healthy Kids on Thursdays as we will be at Carlton Baths YMCA for lots of fun activities

Thank you and all the best for this term.

Finlay

The students in Lucy's grade looked at the CPS "Beliefs about Learning" that were developed by teachers earlier this year. The grade worked on re writing the beliefs so that they more sense to them.

CPS Kids Learning

At Carlton Primary School we think that kids are always learning. Learning makes the world bigger, more interesting, it makes us think and it is more exciting. Children learn in different ways which shows what they need to learn and what they love. Things children learn at home help children to make connections and learn at school. School helps us use our new learning to help us to be the best students that we can be. Children, teachers and the wider community are working together to learn from each other.

Why does planet Earth travel around the Sun?

Planet Earth revolves as it rotates around the Sun. When it's morning in Australia, Australia faces the Sun which makes it bright, when it's night America faces the Sun. When Earth rotates around the Sun we get seasons, we need seasons to help our plants grow. Also to help us eat fruit and vegetables. Rain is also good for the plants. Instead of watering the plants the rain will water them for you.
