

Lets talk Photoshop

Keyboard shortcuts

This is by no means an exhaustive listing as there are a multitude of shortcuts that can be used but I either don't use or very rarely use the function. If you want a complete list do a Google search & you will discover reams of information. Why learn these short cuts? They work at any time, sometimes if you have made a selection (eg levels) you are prevented from using the menu selections to change your view, the shortcuts will allow you to change the view without having to close the dialogue box.

Shortcut	PC	Mac
Navigation Zoom in Zoom out Zoom in & resize window Zoom out & resize window Zoom to fit screen Zoom to 100% Scroll with hand tool	Ctrl ++ Ctrl + - Ctrl + Alt ++ Ctrl + Alt + - Ctrl + 0 Ctrl + Alt + 0 Spacebar + drag mouse	Cmd ++ Cmd + - Cmd + Option ++ Cmd + Option + - Cmd + 0 Cmd + Option + 0 Spacebar + drag mouse
