

## **BRUSH-TAILED PHASCOGALE RECORD SHEET**

As part of a GFNC project, in co-operation with DSE, we are gathering records of Brush-tailed Phascogales within the Geelong region. (Please see info sheet).

Please fill out the record sheet as thoroughly as possible. We stress that all records are of use, no matter how recent or historical, be they of sightings, scats, carcasses or other; don't worry about any technical terms etc.

There is also additional space provided at the end of the table to add any extra information which you think might be useful.

The provision of your details is appreciated so that we may get in touch with you prior to choosing future surveying areas.

Thank-you for your time and interest in this project.

**Please forward the completed form to one of the addresses below.**
