
FUEL COST SHARING

This map is a general guide for trip leaders on how to calculate reasonable fuel costs per person for participants who are car sharing. The zones 1 -10 are assigned a fuel-share cost as per the table.

It is quite in order for a trip leader to apply an extra cost on top of the fuel-share zone rates if the route the car must travel over involves low-economy mountain roads or tracks. Extra charges may apply to cover car-shuffles if they involve a significant increase in the distance travelled.

Members are also to take heed of the necessity to share the use of vehicles. Don't expect the same people to provide the transport when in all fairness you should be prepared to OFFER your own car occasionally

Zone Number	Fuel Share
1	$10
2	$16
3	$23
4	$33
5	$44
6	$50
7	$58
8	$64
9	$70
10	$85
