

SIGNIFICANT FUND RAISING OPPORTUNITY

Flight Recovery is a new, all-natural, Australian made solution to jet lag and travel fatigue.

Flight Recovery is currently available via travel agents and selected pharmacies and now wishes to partner with a leading Club in the District to offer the product directly to Rotary.

The intention is that Flight Recovery would be made available to members and friends of Rotary at a discount to the current recommended retail price, and yet still deliver 100% mark up as a management fee to participating Clubs.

Accordingly The Recovery Company P/L is seeking expressions of interest from a leading Rotary Club to act as principal agent. The Recovery Company would supply the Flight Recovery in wholesale quantities via a 'corporate' shipper and allow the principal agent to on-sell to other Clubs at its own discretion, at a rate that reflects that 'facilitation' role.

PRODUCT BACKGROUND

Travel fatigue and jet lag result primarily from dehydration and Flight Recovery is a clinically proven product developed to overcome the dehydration associated with travel.

All of the ingredients in this innovative, Australian made product are natural, including the great tasting fruit flavour and Flight Recovery mixes easily with water.
