

Hello, my name is Sarah. I am a Masters in Psychology student from Monash University looking for volunteers over 50 years of age to complete a 12 page anonymous survey. The survey will help me with my thesis, which is investigating possible links between the levels of emotional support received in childhood and the current physical and mental health of those over 50 years. The research also investigates whether low levels of emotional support received in childhood can be buffered by good social support, self esteem and feelings of personal control in adulthood.

If you are interested in completing the survey, please e-mail me on Snel2@student.monash.edu to receive a copy. I can send copies via e-mail which can be printed off and posted directly to the university, or if a postal address is provided I can supply envelopes and stamps for return postage. Any addresses submitted will be destroyed upon me sending out the survey.

Thankyou Sarah Nelson
