

## The Entomological Society of Victoria

### Members Excursion - Forest Insects Collection, CSIRO, Monash Uni, Clayton

**Where :** This year's excursion is being kindly hosted by Laurie Cookson at the CSIRO Material Science & Engineering department in Clayton South.

We are to meet at the main reception of the Ian Wark Laboratory. Laurie Cookson or Steve Curle (no affiliation with the CSIRO) will be there to meet members of the society at the reception.

**When :** Tuesday 18<sup>th</sup> August 2009 **19:30 (Note the slightly earlier meeting time)**

**Agenda :** Clearly, the agenda for the evening will be dependent on the investigative work that is being carried out at the time.

But a proposed itinerary, that will almost certainly change slightly, looks something like this:

- Wood Insect Collection
- Termites
- Wood Borers
- Wood Fungi
- Potential Video
- Potential representative Insect display

**Address :** Ian Wark Laboratory, Forestry Division, Bayview Avenue, Clayton

**Directions :** Melway 70 bottom of F9

From Bayview Avenue, drive into the Monash University Clayton Campus; keeping to the left, the CSIRO entrance is a short distance on the left hand side. Once entering CSIRO, the reception and visitors car park is immediately in front of you.

In order for us to gauge interest and numbers, can you please let me know who plans to attend this event and how many of you there may be.

Regards

Steve Curle
