

THEN AND NOW

Pictorial histories of the Monash district

Each book comprises 60 pages of Then & Now images in B&W and colour plus accompanying descriptive text in paperback.

How quickly time seems to pass by us all. Progress doesn't allow for urban development to stand still. No sooner do we get used to seeing a building, a local intersection or an old house, than they all disappear or seemingly transform overnight. Locked-in to the minds of those who still remember the Shire of Mulgrave and the City of Waverley, are the visions of what our city looked like in the years before modern urban development encroached on the once tranquil, rural nature of this municipality.

These books keep alive some of those faded memories of what the current City of Monash looked like over time as progress continues to ensure that the old gives way to the new in our ever-developing and evolving community.
